Nagel Finisher

Specifications - Nagel Finisher for the CLC 5100 & 4000

Canon has built its worldwide reputation by designing and supplying the most well-equipped business solutions – and the Nagel™ Booklet Maker / Finisher is no exception. Designed to perfectly complement the CLC5100 / 4000 high-volume digital colour systems, this Booklet Maker is the quickest way to turn colour short-runs into perfectly finished documents. And it couldn't be easier to operate, due to being supported by Canon's Fiery™ Impose software (formerly DocBuilder™ Pro), enabling the Booklet Maker / Finisher to be used both on-line and as an off-line finishing unit.

The Nagel™ Booklet Maker / Finisher is capable of far more than binding booklets, though – in combination with optional Nagel™ components, it sorts, stacks and trims your prints – even able to remove 'creep' from longer inner sheets to make a professional clean edge.

It creates professional saddle-stitched booklets from a wide variety of paper stocks – matching the media options of the CLC5100 / 4000 – with the option of using loop staples if required.

The Finisher is also useful when producing documents that do not require booklet-making. It stacks up to 1,000 sheets of any paper stock from A5 to 12" x 18", more than enough to support full bleed A3 printing. In addition, when fitted with the optional Shift Tray, the Nagel™ Finisher has a sorting function capable of handling up to 850 sheets.

Best of all, the Nagel™ Booklet Maker / Finisher can be used both on-line and off-line. So, if you need a way to turn your print jobs into professional documents, you are looking for the Nagel™ Booklet Maker / Finisher. Once you've used it, your prints really are bound to impress.
